ByrneWallace LLP,
Dublin, Ireland.

Subject- Application for Summer Internship

Dear Hiring Manager,

I am writing this letter to support my application for the position of Summer Intern at your firm, and to aid the decision-making process for the ongoing recruitment in your firm. I am extremely interested in this opportunity as it aligns with my skill set and previous experience. I am currently pursuing my LLM in International and European Business Law from Trinity College Dublin.

As a law graduate and intern, I have worked with Tier-1 law firms in my country India as well as the Additional Solicitor General of India. Additionally, I have had the privilege of interning under Dr Justice Pushpendra Singh Bhati of the Rajasthan High Court which provided me with an insight into the practical aspect of the judicial system in India. I have experience in drafting commercial contracts, SHAs and SPAs, and NDAs, and conducting extensive and accurate due diligence for ongoing transactions. I also have the acumen for conducting detailed legal research and analysis.

I want to work with ByrneWallace as it is a firm with a global presence, and it would provide me with an opportunity to work on a different array of matters. Being an individual who constantly strives to find out-of-the-box solutions to the dilemmas I am presented with, the prospect of working with like-minded individuals to work towards achieving common goals is very exciting for me. I have also read about some of the recent transactions which the firm has facilitated, such as advising Sceptre Hospitality Resources (SHR), a Texas-headquartered hotel tech company, in its acquisition of Avvio Limited, an AI-powered Irish company providing technology for the International Hotel Industry, and advising German investor Patrizia on the acquisition of the Eight Building, a new office at Newmarket Square in Dublin's Liberties. Further, the firm's clientele includes Ulster Bank, the European Parliament, and the Ballymore Group. The idea of collaborating with these organisations, and working on transactions involving astronomical numbers is my primary motivation behind applying for this role.

My key virtues are communication skills, multi-tasking, teamwork, creativity, and paying attention to detail, developed through participation in ADR and moot court competitions, part-time work, and previous work experience. Therefore, I believe I am well equipped with the skill set required to succeed in the role of an intern. Finally, I assure you that if selected, I will engage in continuous learning and contribute to your office to the best of my abilities.

Thanks and Regards,
Akshat Arora
