Dear Manager,

I am a current International and Business law student at Trinity College Dublin and have been awarded a Global Excellence Scholarship for academic excellence, and having a previous experience of working in litigation in India it is with great enthusiasm that I am writing to apply for the Internship Programme at Byrne Wallace. I believe my knowledge, skills, and experience will be a perfect fit for this role.

My work background and coursework have supplied me with many skills and an understanding of working of courts. During my three-year LLB program at DES college, Pune, India, I had the opportunity to intern with a lawyer, responsible as a defence lawyer at criminal trials. As a pre-law intern I was assigned work of verifying documents, researching and writing summaries of cases. My internship helped me develop a deeper understanding of the law as well taught me a great deal about the legal proceedings.

My experience working as a junior lawyer in India for two years reinforced my enthusiasm for a career in law as I had the opportunity to represent my clients in court. I was assigned a case that involved an offense relating to real estate which comes under Real Estate Regulations Act wherein I had to defend my client, a construction company for delaying the possession of the commercial spaces and flats due to COVID which resulted in successful negotiation between the parties and saving my client's long standing reputation and tens of lakhs of rupees in financial loss. I also had the privilege to provide my services to a non-profit organisation guiding them to comply with present laws and regulations for construction and living standards for retirement homes which was appreciated and covered by the local newspapers.

Detailed on the attached resume, my expertise is in medical negligence litigation and commercial litigation. In one of the many cases that I was assigned, I had to represent a client against an insurance company in court which resulted in a successful trial. I am also interested in Data Privacy as I am writing my dissertation pertaining to the subject with focus on whether GDPR and SLAPP can coexist and how the latter affects the fundamental rights, democracy and rule of law.

I am currently employed as a legal intern at CKT in the Dublin office which primarily focuses on healthcare litigation. I am directly working under the partners and learning the legal systems as well as the working of the courts in Ireland. My work involves legal research, updating briefs, reviewing and summarizing case files as well as visiting the courts to file legal documents as well as observe the trials.

At Byrne Wallace, I look forward to working in a friendly but at the same time ambitious environment that has as well as enhance my knowledge, skillset and grow in my career through the detailed and competitive courses provided by you with the opportunity to work alongside leading professionals in the firm.

I believe my acumen, talents and motivation would be an asset to Byrne Wallace, in the work they do. I've read employee testimonials and heard of your enthusiasm for encouraging employee growth through education, training, and vast resources. I would love to join your team, continue to create great work, and grow within the firm by learning new skills. The working and learning environment at Byrne Wallace is exactly the type of environment in which I hope to work in.

I am excited about the possibility of speaking with you further about this outstanding opportunity with you. Thank you for your time and consideration.

Sincerely,
Tanveen Gill
