Re: Summer Intern Programme

Dear Sirs,

I am a Law Student currently studying for my first set of FE-1's. I have graduated from Dublin Institute of Technology with my Law Degree (LLB) and it is my hope that I might further my practical knowledge with your firm.

I am delighted to have chosen Law for my third level education. My degree involved independent research, requiring intuitive, self-motivation and dedication to the tasks and requirements presented to me. For example in Evidence Law, an understanding of the circumstances in which evidence is both admissible and inadmissible in the profession was essential. I found this particular subject very stimulating.

I am a hard worker and a quick learner with the ability to meet deadlines. I take this opportunity to enclose my C.V herewith, for your perusal. I have excellent references, and naturally, would be delighted to make myself available for interview, at any time suitable to you.

I would like to thank you for your time taken in considering my employment application, and I look forward to hearing from you, at your convenience.

Yours faithfully,

Aisling Byrne
