## SUMMER INTERNSHIP

---

Dear Sir/Madam,

I'm applying to the Byrne Wallace summer internship program as I admire that the firm's expertise extends across all the core areas of Irish Law. I am most interested in Property Law and Contract Law and would like to witness the other areas of law in practice. I am a driven individual with the ultimate objective of being a solicitor. I'm currently a first-year Masters of Common Law student. My overall objective is to pass the FEI exams next summer.

I want to gain insight into the reality of being a solicitor. I am interested in your intern program because of the hands-on experience you provide. I believe this would be invaluable to me as working closely with trainees and solicitors on transactions and cases is the best means to experience law in practice.

Byrne Wallace, as a firm, represents to me the realities of being a solicitor which is more than what my textbook can tell me. I believe it demonstrates the commercial aspect of the industry which I find appealing. I am a motivated person who enjoys problem-solving and have in the past led group projects, managed events, and been active in University through society committees. I would like to develop my existing skillset in a corporate environment this summer.

Sincerely,  
Lisa O'Mahony
