**Object: Summer work or internship**

*The 9th January 2018*

Madame, Sir,

Currently studying a LLM program on Business Law with the University Catholic of Lyon (France) and with the University of Maynooth (Ireland), I am looking for a company who is willing to give me a summer work or a legal internship.

I am available from the 1st of June 2018 to the 31th of August 2018.

My friends will describe me as smiling and enjoyable with capabilities of adaptation. I am also very organized on every things that I do, and I can work under a great pressure without any problems. I hate being late, so I am usually five or ten minutes early for everything.

During my scholarship I practiced a lot of english, and this year with a whole new level because all my classes had been taught in english, plus the fact that I will spend six months in Ireland will allow me to increase my level even further.

I had the chance to worked in many different places and in different domains and that gave me the possibilities to create a skill of quick adaptation to my new environment. And I think this is valuable and important values.

During the next few months that I will pass in Ireland, I will be focus on my memoire that I need to do in order to valid my LLM degree. I do not have the subject yet but I certainly do know that the topic will be in relation with trade and business law, not only because it is the name f my degree, but mostly because I personally find quite interesting the all relation between the law and companies that do international business and trade.

I will be very grateful if you late me work with you and your team this summer because I will be able to see and understand the real work of an international lawyer in business law, but also to have a better understand of some of the arbitration domain which interest me for a long time now, it is kind of the reason why I apply for a law degree.

If you do agree to take me in for this summer, I will not be the « cliche » of the intern that work slowly and waiting to have a case on his table, on the opposite, I hate being bored so I will be much like the annoying intern, in a good way, that always ask for work and do not look the clock and count down the minutes that left before the weekend.

I am at you disposal to give your more information, and I will be pleased to express my motivation to you in person.

Waiting for your response, please accept, Madame, Sir, my best regards.
