With Regards to your Summer Internship Programme

I am interested in applying for the Internship Programme position that you have within ByrneWallace.

I am a final year Law student with the Dublin Institute of Education determined to pursue a career as a solicitor upon graduation. I am particularly interested in working for your office and would like to speak to you about the opportunities available. As you can see from my enclosed Curriculum Vitae I have work experience as a manager of several tourist offices - a job I held down while completing my undergraduate degree - and I have experience of working in a corporate office environment. However I do not have experience in a legal office environment, which is why I believe this internship would be a perfect opportunity for me to learn, grow and help further my chosen career. I also believe my former office experience would mean I would be able to familiarise quickly myself with your company and my roles as an intern and I would become a contributing member of your team at ByrneWallace.

I have taken every opportunity possible to prepare myself for a career in law. In my old workplaces I involved myself with the legal departments as much as I could and in my studies I have regularly reached for extra-curricular work to improve myself from entering competitions to applying for research groups. I will be speaking in February at the Trinity Law Students Colloquium on a criminal law research paper I wrote due to successfully winning their Abstract Competition, the first student from DIT to win a speaking place in the Law Colloquium's history.

Thank you for your consideration, and please see attached my CV.

Respectfully yours,  
Pádraig Mac Aodha
