Dear Beth Onslow ,

My name is Robert Morgan and this is my letter of application for the Summer Internship. I am currently a second year law student in Trinity College Dublin. In applying for Summer Internships , two main areas of research for me were the areas of law the firm practices in and the emphasis the firm places on it staff. Areas such as EU law & Competition , Administrative law , Life Sciences and Health and Social Care appeal to me and I would bring my interest in these subjects to Byrne Wallace. In my perseverance I am a driven and ambitious person seeking to achieve the best in all I do and I believe that this fits in with the personable manner that the firm emphasises when advising its clients. I have maintained a 2:1 level of results in my degree to this point.

Although I do not have any legal work experience , I have been in continuous employment over the last 4 years in numerous other roles. I have worked in part time positions in Jaffas Cafe as a Barista and in Shaws Department Stores as a Retail assistant. I have been employed by Shaws since October 2015 and work every weekend alongside my studies. I find that working alongside my studies has improved the balance in my approach to reading and social life. It focuses my concentration on the task on hand and improves my time management skills in dealing with any balancing problems. Alongside this , I maintain a vast participation in college life . I am the elected Class representative from our year in the Students Union , I am a staff writer for the University Times , I was captain of the Trinity College GAA freshers team in 2016 and I am currently on the Committee of Enactus TCD , a social entrepreneurship society. I am currently working on a reusable water bottle business plan that is in its infancy of development.

I enjoy working with levels of responsibility as I feel it brings out the best in me. In my secondary level education I was elected Head Boy by classmates and I also won the Senior Student of the year and Senior Academic Student of the year in 2015. Presently , I feel great privilege in representing my classmates views in college wide problems with the Students Union. In doing so I attend two 4 hour long meetings a month to discuss any problems and use the power of vote I have in my classes best interests. However I also know when it is time to step back and realise that not everything can be pursued purely by myself. When I received my leaving cert results in 2015 I realised there was more to life than the four walls of a classroom. I took a gap year in which I travelled all over Europe and used my TEFL Qualification as a means of Employment. In pursuit of my love for travelling , I have been

accepted to study at the University of Zurich , Switzerland for 1 year beginning in September 2018.

With my passion for academics ,diversity and responsibility I hope this personality comes across in this application letter and my CV. I would accept with privilege any interview to work as an Intern with ByrneWallace.

Kind Regards ,

Robert Morgan.
